

The trials and tribulations of Dave and his email. Now with Pictures.

To start, I checked out the settings directly from the webmail. I tried what you put in your IM and it did not work.

#### Manual Settings

If you do not see an automatic configuration script for your client in the list above, you can use the settings below to manually configure your mail client:

| <b>Secure SSL/TLS Settings<br/>(Recommended)</b>        |   |
|---|---|
| <b>Username:</b>  | nihsen  |
| <b>Password:</b>  | <i>Use your cPanel password.</i>                            |
| <b>Incoming Server:</b>                                 | krypton.forumheroes.com<br>IMAP Port: 993<br>POP3 Port: 995 |
| <b>Outgoing Server:</b>                                 | krypton.forumheroes.com<br>SMTP Port: 465                   |
| Authentication is required for IMAP, POP3,<br>and SMTP. |   |

| <b>Non-SSL Settings<br/>(This is <b>NOT</b> recommended.)</b> |   |
|---|---|
| <b>Username:</b>  | nihsen  |
| <b>Password:</b>  | <i>Use your cPanel password.</i>                    |
| <b>Incoming Server:</b>                                       | mail.nihsen.com<br>IMAP Port: 143<br>POP3 Port: 110 |
| <b>Outgoing Server:</b>                                       | mail.nihsen.com<br>SMTP Port: 25                    |
| Authentication is required for IMAP, POP3,<br>and SMTP.       |   |

So to Google I go.

**Check mail from other accounts (using POP3):**  
[Learn more](#)

[Add a POP3 mail account you own](#)

So far so good. But this is the easy part.

### Add a mail account you own

Enter the email address of the account to get mail from  
(Note: You may add 5 more of your accounts)

Email address:

Okay, so using the webmail for secure connection, I entered the following.

### Add a mail account you own

Enter the mail settings for David@Nihsen.com. [Learn more](#)

---

Email address: David@Nihsen.com

Username:  

Password:  

POP Server:   Port:  ▼

- Leave a copy of retrieved message on the server. [Learn more](#)
- Always use a secure connection (SSL) when retrieving mail. [Learn more](#)
- Label incoming messages:  ▼
- Archive incoming messages (Skip the Inbox)

Nope. Didn't work.

## Add a mail account you own

Enter the mail settings for David@Nihsen.com. [Learn more](#)

Email address: David@Nihsen.com

**There was a problem connecting to krypton.forumheroes.com**

[Show error details](#)

Username: nihsen 

Password: 

POP Server: krypton.forumheroes.com  Port: 995 ▼

- Leave a copy of retrieved message on the server. [Learn more](#)
- Always use a secure connection (SSL) when retrieving mail. [Learn more](#)
- Label incoming messages: David@Nihsen.com ▼
- Archive incoming messages (Skip the Inbox)

Cancel

« Back

Add Account »

Let's try it as a NON-secure connection.

## Add a mail account you own

Enter the mail settings for David@Nihsen.com. [Learn more](#)

Email address: David@Nihsen.com

**There was a problem connecting to krypton.forumheroes.com**

[Show error details](#)

Username: nihsen 

Password: ..... 

POP Server: mail.nihsen.com  Port: 110 ▼

- Leave a copy of retrieved message on the server. [Learn more](#)
- Always use a secure connection (SSL) when retrieving mail. [Learn more](#)
- Label incoming messages: David@Nihsen.com ▼
- Archive incoming messages (Skip the Inbox)

Cancel

« Back

Add Account »

Will you look at that? It worked! (And Lastpass won't shut up.)

\* Should LastPass remember this password? Save Site Never... Not Now x

✓ **Your mail account has been added.**

You can now retrieve mail from this account.  
Would you also like to be able to send mail as David@Nihsen.com?

Yes, I want to be able to send mail as David@Nihsen.com.  
 No (you can change this later)

Next Step »

Okay, so that's to get the mail FROM the site. Time to set up how to SEND through them. Since the last one was unsecured, I'll set this one up the same way.

## Add another email address you own

### Send mail through your SMTP server

Configure your mail to be sent through Nihsen.com SMTP servers [Learn more](#)

SMTP Server:  \*<sub>2</sub> Port:  ▼

Username:  \*<sub>2</sub>

Password:  \*<sub>2</sub>

- Secured connection using [TLS \(recommended\)](#)
- Secured connection using [SSL](#)
- [Unsecured connection](#)

**You have chosen to use an unsecured connection to connect Gmail servers to your provider. Be aware that others might be able to see what you're sending. [Learn more](#).**

Failure.

### Add another email address you own

#### Send mail through your SMTP server

Configure your mail to be sent through Nihsen.com SMTP servers [Learn more](#)

SMTP Server:  \*<sub>2</sub> Port:  ▼

Username:  \*<sub>2</sub>

Password:  \*<sub>2</sub>

Secured connection using [TLS](#) (recommended)

Secured connection using [SSL](#)

[Unsecured connection](#)

You have chosen to use an unsecured connection to connect Gmail servers to your provider. Be aware that others might be able to see what you're sending. [Learn more](#).

**Couldn't reach server. Please double-check the server and port number.**

Let's try it again using the information from the secure portion.

## Add another email address you own

### Send mail through your SMTP server

Configure your mail to be sent through Nihsen.com SMTP servers [Learn more](#)

SMTP Server:   Port:  ▼

Username:  

Password:  

Secured connection using [SSL \(recommended\)](#)

Secured connection using [TLS](#)

**Couldn't reach server. Please double-check the server and port number.**

Holy crap! It worked!

### Add another email address you own

---

#### Confirm verification and add your email address

---

Congratulations, we successfully located your other server and verified your credentials. Just one more step!

An email with a confirmation code was sent to **David@Nihsen.com**. [\[Resend email\]](#)  
To add your email address, do one of the following:

Click on the link in the confirmation email      |      Enter and verify the confirmation  
OR      code  
|           

[Close window](#)

I enter the code and VOILA! Success.

**Send mail as:**  
(Use Gmail to send from your other email addresses)  
[Learn more](#)

**David Nihsen <edrondol@gmail.com>**  
Reply-to address: David@Nihsen.com

**David Nihsen <David@Nihsen.com>**  
Mail is sent through: krypton.forumheroes.com  
Secured connection on port 465 using SSL

**David Nihsen <workhouseentertain@gmail.com>**  
[Add another email address you own](#)

**When replying to a message:**  
 Reply from the same address the message was sent to  
 Always reply from default address (currently David@Nihsen.com)  
(Note: You can change the address at the time of your reply. [Learn more](#))

---

**Check mail from other accounts (using POP3):**  
[Learn more](#)

**David@Nihsen.com**  
Last checked: 1 minute ago. [View history](#) [Check mail now](#)

[Add a POP3 mail account you own](#)

Now to test. Receiving email? Failed. Sending email? Failed.

### Mail fetch history for "David@Nihsen.com"
